

COMPANION

An app to make your life easier

COMPANION

The needs it satisfies:

Do you need something, or someone, that helps you understanding your health and fitness?

Our companion can do that. Just link one of your devices and you will be followed by one of our digital companions.

WHAT IS IT?

Companion is a new type of app partly on mobile and partly on the internet that is devoted to help you. It tries to analyze and to find value in big data from health and fitness internet things (Withings pressure measurement tool, Fitbit bracelets, Google Fit health data API,).

PLAN

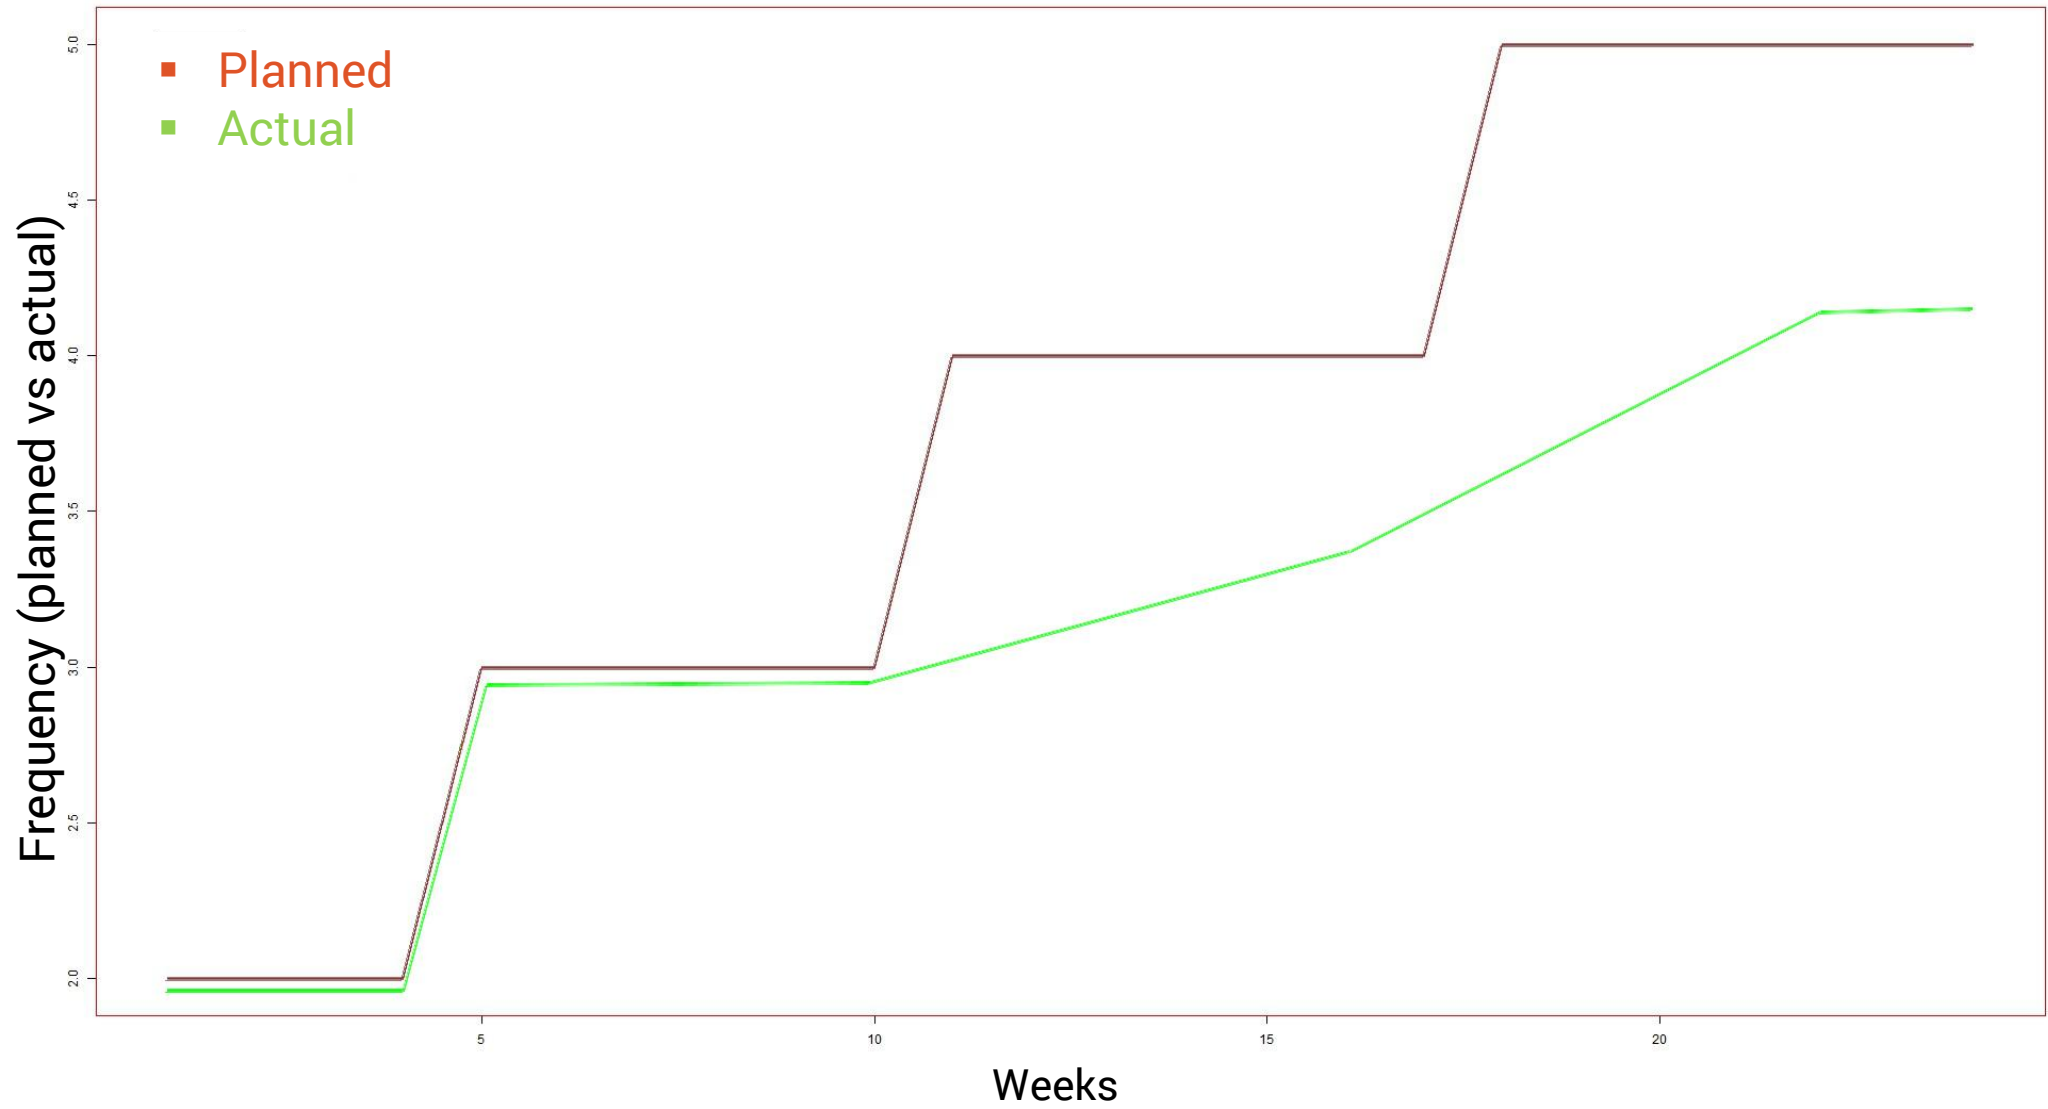

You start with a fitness plan chosen by you and the Companion assigned to you will give evaluation of your fitness data and some advices. It will provide a weekly report about your progresses with analysis and evaluations. You can ask any time for extra analysis on demand about the current day or the current week status.

Of course it is up to you the responsibility to manage your training. For lazy or overrunning persons it can be useful a digital companion devoted full time to follow your progresses or failures helping to improve your performance.

THE EFFECT

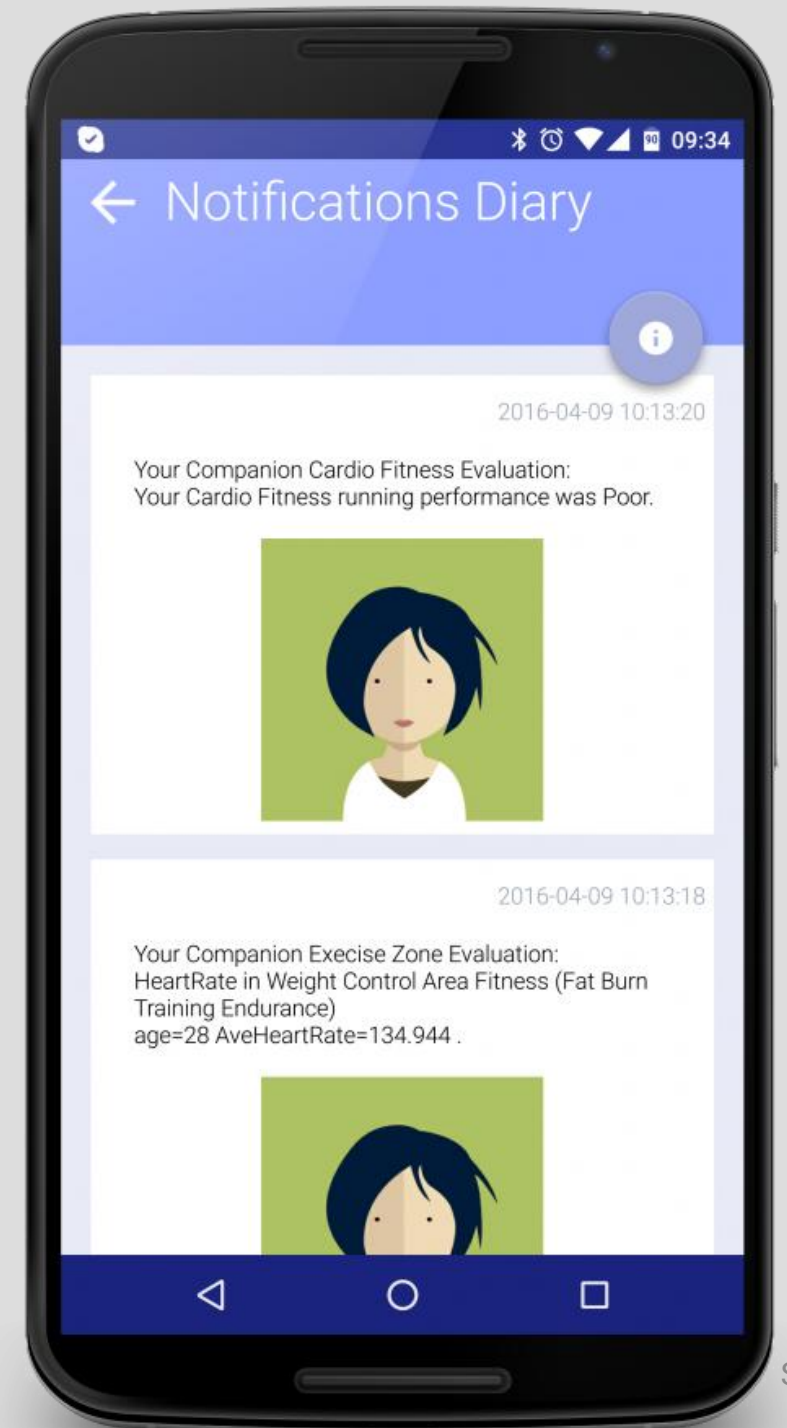

TECHNOLOGY

Companion is contextual rule based, it use **AI** technologies like rules, predictive analytics, semantic networks and simulation.

All these tools are used to generate reports about your fitness status and recommendations that are sent to your mobile using push notifications.

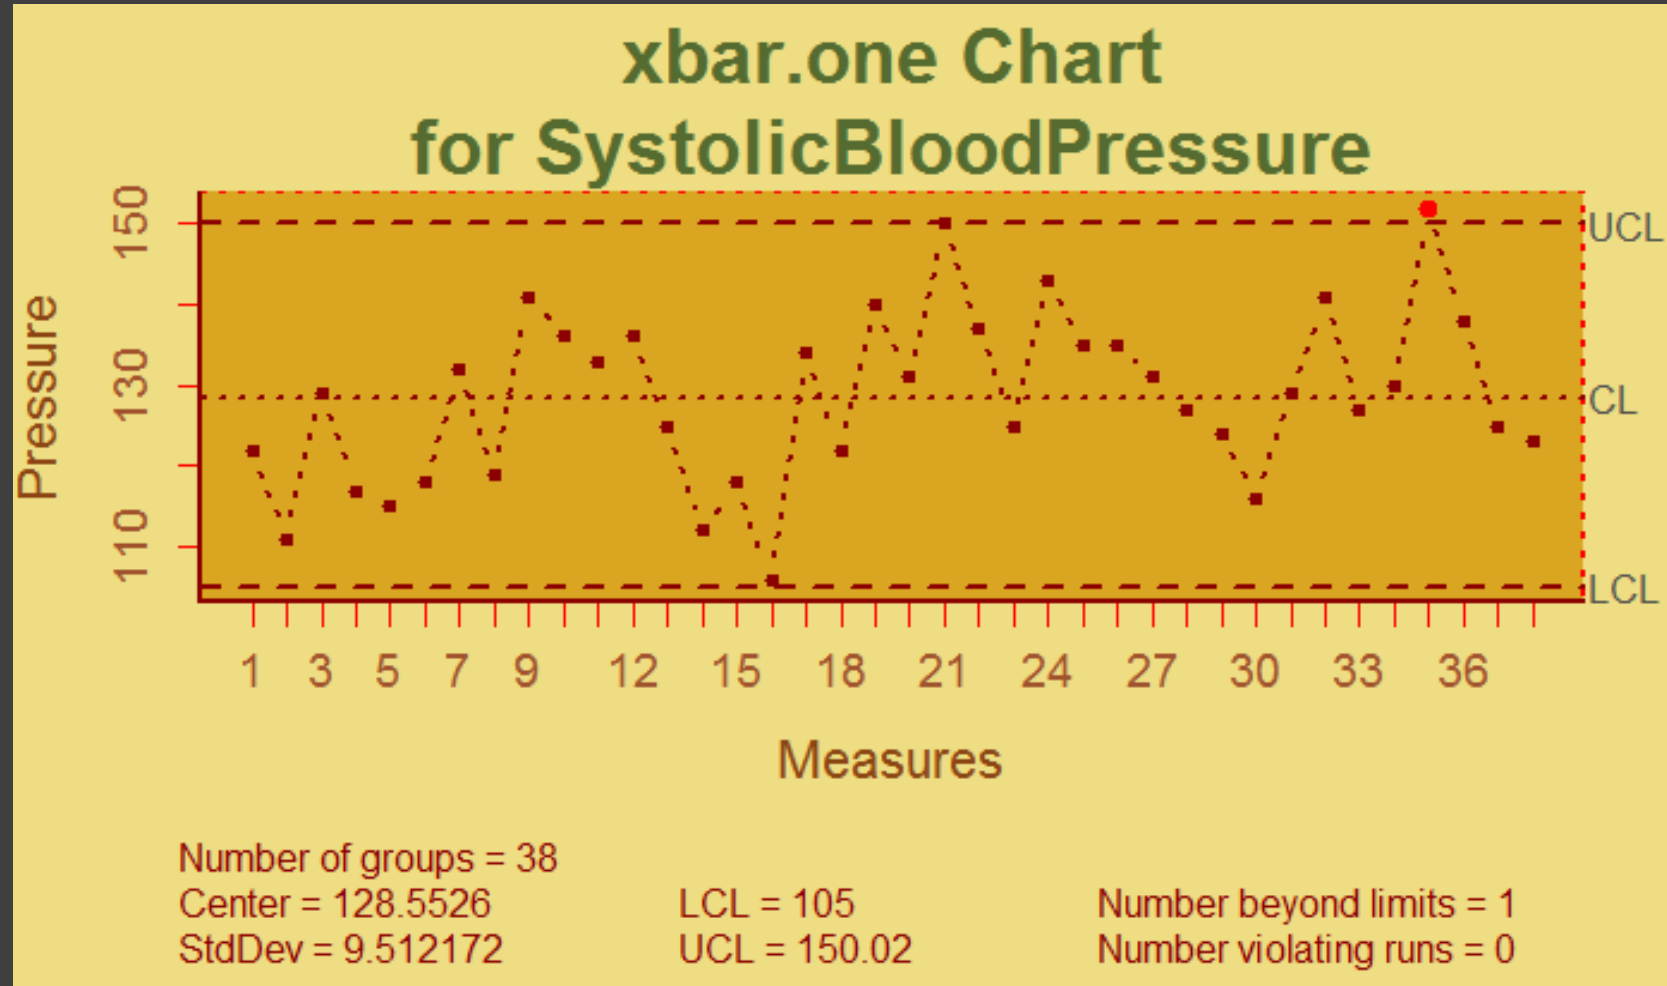

FEATURES

Integrate health measures from different devices (Fitbit, Google Fit, Withings, iHealth, ...)

ANALYTICS

Generate predictive and prescriptive analytics on your data helping you to understand what is happening in your body

Megatris Comp. LLC

We create cloud services and mobile apps to make people life easier.
Our mobile apps are integrated with Megatris Cloud to sell services and
goods.
